

Sea ahead. We believe in the power of Digital.

We live in challenging times. Future-proofing and digital monitoring are becoming more and more crucial. Our flexible digital solutions help you stay competitive, fast and safe in the everchanging marine sector.

The industry is digitalizing. Don't miss the boat.

Everybody is talking about digitization. We're doing it. And revolutionizing the marine business along the way. Because we believe that to safely navigate through the uncertain seas of tomorrow - it needs technologies of tomorrow. Our team of experts at MAN

Energy Solutions has already developed a wide range of digital features for the specific requirements of the marine industry.

From predictive monitoring, assistance and advisory over flexible upgrades of

your equipment up to sophisticated data solutions - we want to help you fully leverage Digital in any aspect of your business.

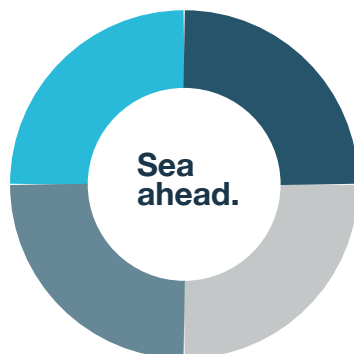

Our offering

PrimeServ Assist

Our one-stop solution for operational intelligence and engine optimization. With 24/7 direct access to get emergency support from our MAN experts. Engine network security and safe connectivity guaranteed.

MAN Data+

MAN Data+ combines profound domain knowledge and next-level technology for maximum value creation

MAN Asset+

State-of-the-art software solutions - both on of's and updates. With Full flexibility and customizability while being always up-to-date.

MAN CEON

MAN CEON is our sophisticated cloud platform and enabler of our digital portfolio.

When state-of-the art digital technology meets expertise and domain knowledge.

Reliable and safe solutions for data leverage.

We believe in the reliability and robustness of our engines. And we believe that our digital solutions can make them even better. All with the goal to raise efficiency, availability, security, safety and also have a positive impact on the environment.

At the core of our digital portfolio there are three columns reflecting the different areas of application of our products.

PrimeServ Assist

PrimeServ Assist combines state-of-the-art AI with profound domain knowledge of maximum equipment availability, safety, and performance. Our sophisticated algorithms help detecting problems ahead of time while our experts read and analyse the available data and provide next-best-action advice.

MAN Asset+

MAN Asset+ covers all of (our customizable and flexible solutions to customize and upgrade equipment with new features and functionalities.

MAN CEON

MAN CEON is the cloud-based platform for the collection, processing and analysis of sensor data.

MAN Data+

With MAN Data+, we help you create maximum value from your equipment data and turn it into a key vehicle in meeting the MAN Data+ growing demands of availability, efficiency and decarbonization.
