MAN Energy Solutions to Provide Services for Greece's First LNG Truck-Loading Pilot Station

Greek Construction Company, TERN A S.A., a 100% subsidiary of the GEK TERN A Group, has awarded MAN Energy Solutions the contract for the engineering of, and supplying services to, an LNG truck-loading infrastructure project.

The pilot station is part of the Hellenic Gas Transmission System Operator (DESFA) development programme for the Revithoussa LNG Cryogenic Facilities Terminal at the Gulf of Megara, west of Athens. The terminal has a storage capacity of 225,000 m³ and is a strategical milestone for Greece, providing security of energy supply, operational flexibility in the transmission system, and increased capability to meet peak gas-demand.

"We will deliver a state-of-the-art, fully-engineered, logistical infrastructure for managing the downstream supply of LNG via trucks to clients," said Louise Andersson, Head of MAN Cryo, MAN Energy Solutions' cryogenic division.

Thanassis Papaioannou, Head of Turbomachinery and Power Plants of MAN Energy Solutions in Greece, noted: "We are pleased to bring our cryogenic capabilities to DESFA by joining forces with TERN A, one of the leading construction companies in the country. The implementation of this project will create new growth opportunities in areas where there is no existing gas network."

Carsten Dommermuth, Senior Manager Business Development at MAN Energy Solutions, referred to the importance of this kind of LNG hub: "With the availability of central storage facilities for liquefied methane, natural gas now becomes available – independent of pipelines – to support the decarbonisation of the power industry with the cleanest fossil fuel available to the market. Furthermore, this kind of project is also important in terms of future readiness for the use of clean, green hydrogen."

MAN Energy Solutions acts as a global EPC partner covering the entire value chain for LNG-to-Power.

About TERN A S.A.

TERN A, the GEK TERN A Group's construction division, has been actively involved in the implementation of a broad spectrum of public and private projects of considerable budget and complex know-how for half a century. The company's expertise spans from concession contracts to the construction of infrastructure projects (highway – metro – railway) and energy power plants (thermal, wind, hydro) to industrial buildings and E/M installations, as well as to a wide spectrum of building projects (hospitals, resorts, cultural centres, office buildings, etc.) GEK

TERNA GROUP is one of the leading business groups in Greece with realised investments of more than €2.5 billion in recent years. The Group has a leading position in the fields of infrastructure, energy production, supply and trade from thermal sources and RES, concessions, waste management as well as real estate development and management.

MAN Energy Solutions enables its customers to achieve sustainable value creation in the transition towards a carbon neutral future. Addressing tomorrow's challenges within the marine, energy and industrial sectors, we improve efficiency and performance at a systemic level. Leading the way in advanced engineering for more than 250 years, we provide a unique portfolio of technologies. Headquartered in Germany, MAN Energy Solutions employs some 14,000 people at over 120 sites globally. Our after-sales brand, MAN PrimeServ, offers a vast network of service centres to our customers all over the world.
