ISO 27001 Certification Highlights Commitment to Data Security

MAN CEON, the advanced digital platform from MAN Energy Solutions, has achieved ISO/IEC 27001:2022 certification for its Information Security Management System (ISMS).

Designed for real-time monitoring and support, MAN CEON leverages cutting-edge data analytics, machine learning, and predictive technologies to optimise performance, boost efficiency, and reduce downtime for MAN Energy Solutions products globally.

The ISO/IEC 27001:2022 certification is an internationally recognised standard that establishes a robust framework for managing and safeguarding information assets. It ensures data confidentiality, integrity, and availability while demonstrating an organisation's ability to address risks from cyber threats, data breaches, and other security challenges.

Gregory Puckett, Chief Digital Officer at MAN Energy Solutions, commented: "We are proud to achieve this globally recognised certification, affirming the strength and reliability of MAN CEON's digital infrastructure. It underscores our commitment to delivering secure, high-quality digital solutions that meet the highest standards of cybersecurity for our customers."

MAN Energy Solutions enables its customers to achieve sustainable value creation in the transition towards a carbon neutral future. Addressing tomorrow's challenges within the marine, energy and industrial sectors, we improve efficiency and performance at a systemic level. Leading the way in advanced engineering for more than 250 years, we provide a unique portfolio of technologies. Headquartered in Germany, MAN Energy Solutions employs some 14,000 people at over 120 sites globally. Our after-sales brand, MAN PrimeServ, offers a vast network of service centres to our customers all over the world.
