**L27/38 Propulsion  
Woodward Governor Top**

SL14-588/BTT  
March 2014

**Concerns**

Owners and operators of MAN Diesel & Turbo four-stroke diesel engines.  
Type: L27/38 Propulsion

Dear Sir or Madam

A replacement kit with a new and improved governor top design (speed setting motor unit) is now available for L27/38 propulsion engines equipped with Woodward UG10 MAS governors.

In some cases we have experienced unsteady governors due to loss of settings in the old-type governor top. This problem will be eliminated by installing the new unit.

The new unit can be used with the same Woodward driver box and cable/connector as with the old unit.

It is recommended that the installation and the following adjustments are carried out by an MAN Diesel & Turbo service engineer.

To order the governor replacement kit, or to get more information, please do not hesitate to contact our Technical Service Department:  
Phone: +45 9620 4100  
Fax: +45 9620 4040
